Carna Medical Technology stands as a global pioneer in beauty and medical innovation, powered by a strong engineering foundation and an unwavering commitment to excellence. Based in the Netherlands, our company proudly delivers advanced, high-technology devices that are trusted and used in more than 45 countries worldwide – a testament to our global influence and reliability.

At Carna Medical, continuous innovation is at the core of our vision. We integrate the latest technological advancements into every product we create, ensuring exceptional performance across both aesthetic and medical applications. Renowned for their precision, safety, and effectiveness, our devices are highly valued by professionals, clinics, and end-users around the world.

As a leading Dutch manufacturer of beauty technologies, we contribute significant value to the global economy through our advanced hair-removal systems, skin, nail and hair treatment technologies, ultrasound platforms, radio-frequency systems, body contouring systems, and fat-reduction devices. Our expanding research and development efforts further strengthen our presence in a rapidly evolving global market.

Carna Medical's commitment to excellence has been internationally recognized: Market Inside Group, the largest research organization in the United States, named Carna Medical among the Top 10 Beauty Device Manufacturers Worldwide for the years 2022–2030 – a prestigious acknowledgment of our global leadership.

Moreover, Carna devices are proudly chosen in some of the most prestigious locations across different continents – from the luxury resort spas of the Maldives to the royal palaces of Gulf countries. This widespread trust reflects the unparalleled quality and sophistication of our technologies, solidifying Carna Medical as a preferred global brand in the world's most distinguished environments.

Smart AI Technology Meets Quattro Wavelengths with Felix Diode

Thanks to the New Quattro Technology, you will be able to epilate much more effectively with 4 different wavelengths at the same time.

With Quattro Diode Laser Technology, which combines Dutch engineering and Dutch quality, you will minimize your laser hair removal time and maximize customer comfort and satisfaction.

With Carina Felix Quattro Diode Laser, which is highly effective on all skin types, you can easily destroy the hair follicle and reduce the number of epilation sessions.

With its special cooled head, you will be able to have extremely comfortable and painless hair removal sessions.

Discover the power of the new Quattro Diode technology, which includes 620nm IPL, 755nm, Alexandrite, 808nm Diode and 1064nm ND:Yag wavelengths in a single head.

With the new epilation technology that can comfortably and painlessly destroy the hair follicle with 3D Quattro energy, you will save time and you and your customers will be satisfied.

Felix Quattro Diode is today's most comfortable and effective solution for hair removal. With its new headpiece with different wavelengths, the Quattro Hybrid laser can treat all skin and hair types throughout the four seasons, providing painless and fast treatments and the best possible results.

Experience Future of Hair Removal

Say goodbye to outdated hair removal methods and hello to smooth, hair-free skin with our Quattro Wavelengths Diode Laser technology. Whether you're a practitioner seeking to enhance your clinic's offerings or an individual looking for a permanent solution to unwanted hair, our Quattro Laser is your ticket to effortless beauty and confidence.

By targeting a broader spectrum of hair follicles, Felix Quattro Laser achieves enhanced efficacy compared to traditional diode lasers. This means fewer treatment sessions and better outcomes for our clients.

CARNA
MEDICAL TECHNOLOGY

The handpiece is then ready for the next session—clean, sterile, and safe, without any manual intervention.

Ultraviolet (UV) sterilization is a scientifically validated method widely used in medical and clinical environments due to its ability to inactivate pathogenic microorganisms by disrupting their DNA and RNA structures. This technology ensures consistent, repeatable, and operator-independent sterilization, reducing contamination risks and improving patient safety.

By eliminating manual sterilization procedures, the system saves time, minimizes human error, and supports higher treatment throughput in busy clinical settings. This innovation establishes a new hygiene standard for diode laser devices, positioning Felix Quattro among the most advanced and safety-oriented laser systems available today.

TECHNICAL SPECIFICATION

Parameter	Specification
 Wavelength	755 nm / 808 nm / 940 nm / 1064 nm
 Laser power of handpiece	3.200 W
 Spot size	φ8 mm / 5×5 mm / 10×10 mm / 12×20 mm / 20×40 mm
 Pulse width	5 – 200 ms
 Frequency	1 – 10 Hz
 Fluence	0 – 120 J/cm ²
 Laser intensity	10 – 100
 Cooling system	Air + Water + Semiconductor + TEC
 Cooling System	-25°C ~ 5°C
 Water volume	3 L
 LCD screen	15.6 inch touch screen
 Electricity	110 VAC – 60 Hz / 220 VAC – 50 Hz
 Packing size	106 cm × 60 cm × 65 cm
 Gross weight	69 kg
 Power	2600 W

Future's Skin Care Technology

TRINITY

Microfrequency & Ozone Technology

Introducing a true original innovation by Carna Medical Technology – the Trinity-Hyper Skin Booster, a next-generation system designed to redefine aesthetic treatments at their core.

As the first device in Europe to combine advanced micro-frequency and ozone technology, Trinity is engineered to work where real transformation begins: within the three fundamental layers beneath the skin. This is not a conventional treatment approach – it is a longevity-driven solution that targets the biology of aging itself.

Trinity's unique mechanism stimulates and restores fibroblast activity, reactivating the skin's natural ability to produce collagen and regenerate from within. By optimizing cellular function at a deep level, it helps return the skin to a healthier, stronger, and visibly younger state – up to 10 years rejuvenated.

The synergy of:

- Micro-frequency technology, activating cellular energy and communication
- Ozone technology, enhancing oxygenation, purification, and deep tissue repair

creates a powerful regenerative environment that addresses 30+ skin, hair, and nail concerns with outstanding efficiency.

Clients experience:

- Visible results from the very first session
- Completely pain-free and non-invasive treatments
- No downtime – immediate return to daily life

Trinity-Hyper Skin Booster is more than a device – it is a new category of aesthetic technology, built on innovation, originality, and scientific excellence.

Reprogram the skin. Restore its youth. Redefine longevity.

Trinity Hyper Tip

Unlock a new standard in advanced skin rejuvenation with the Trinity Hyper Tip – a highly versatile, precision-engineered technology developed to elevate both aesthetic and therapeutic outcomes.

Designed to address multiple skin concerns with exceptional accuracy, the Trinity Hyper Tip supports advanced anti-aging protocols, enhances the skin's natural regenerative processes, and improves overall texture for a smoother, firmer, and more radiant appearance.

Powered by Carna's innovative micro-frequency and ozone technology, this system works in harmony with the skin's biology to deliver targeted, high-performance results at a deeper level. All treatments are performed through a gentle, non-invasive approach, ensuring maximum comfort, zero downtime, and consistently visible improvements.

Step into the future of aesthetic and dermatological innovation with the Trinity Hyper Skin Booster – where precision technology meets transformative care.

HYDRA VORTEX

14 IN 1 PROFESSIONAL SKIN CARE TECHNOLOGY

360° ROTATING SKIN REJUVENATION

Welcome to the future of skincare technology with Carina Medical. Introducing the revolutionary 14-in-1 Hydra Vortex Peel 360, a cutting-edge device designed to elevate your skincare regimen to unprecedented heights. Dutch Engineered with precision and innovation, this device combines 14 essential skincare functions into one seamless experience, promising radiant, rejuvenated skin with every use.

Experience the next level of skincare with JetPower technology. Combining advanced hydro-dermabrasion with gentle exfoliation and deep hydration, JetPower delivers nutrient-rich serums directly into your skin, rejuvenating from the inside out. Perfect for all skin types, this non-invasive treatment leaves your skin refreshed, glowing, and visibly healthier after just one session.

HYDRA VORTEX

BENEFITS BEYOND EXPECTATION

At the heart of the Hydra Vortex Peel 360 lies its innovative rotating mechanism. Unlike traditional skincare devices, this revolutionary technology provides a 360-degree coverage, delivering unparalleled efficiency and effectiveness. Experience thorough cleansing and exfoliation as the device effortlessly rotates, leaving your skin smoother and more receptive to subsequent treatments.

Imagine having the power of 14 skincare treatments at your fingertips. From deep cleansing and exfoliation to serum infusion and rejuvenating massage, the Hydra Vortex Peel 360 does it all. Each function is meticulously crafted to address specific skincare needs, ensuring comprehensive care for your complexion.

REVOLUTIONARY 360-DEGREE ROTATION TECHNOLOGY

● Technology

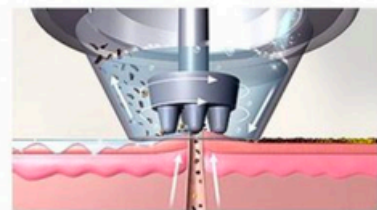

360° Rotating handpiece

Rotating hand-piece performs chemical and physical peeling at the same time.

Tip

Fast rotating tip with strong vacuum pressure. Made of flexible silicone material, the tip is soft and feels pleasant on patients' skin.

Penetration of Solutions

Patented rotation assists cosmetic solution to be absorbed into deeper layer of the skin.

Large tip for cheeks and forehead, small tip for T zone or curved region.

JORDI

BODY CONTOURING

**ELEVATE YOUR BEAUTY
WITH THE ART OF BODY SCULPTING**

Elevate Your Beauty with the Art of Body Sculpting

Discover Jordi Body Contouring, the next-generation, non-invasive technology crafted to sculpt and define the body with elegance and precision. Perfect for high-end clinics, med spas, and luxury wellness centers, Jordi harnesses advanced vacuum, radio-frequency (RF), and infrared energy to transform your clients' contours – without surgery, discomfort, or downtime.

What Is Jordi Body Contouring?

Revolutionary Non-Invasive Body Transformation

Jordi is a state-of-the-art, surgical-free solution designed to contour, tone, and rejuvenate. By combining vacuum technology, RF heating, and infrared energy, it stimulates the body's natural processes to break down fat, smooth skin texture, and improve lymphatic drainage – all without downtime.

Tailored for Safety and Personalization

Each Jordi session is customizable. Parameters can be adjusted to match different body areas and individual client needs, ensuring safe, natural-looking results that feel like a personalized spa experience.

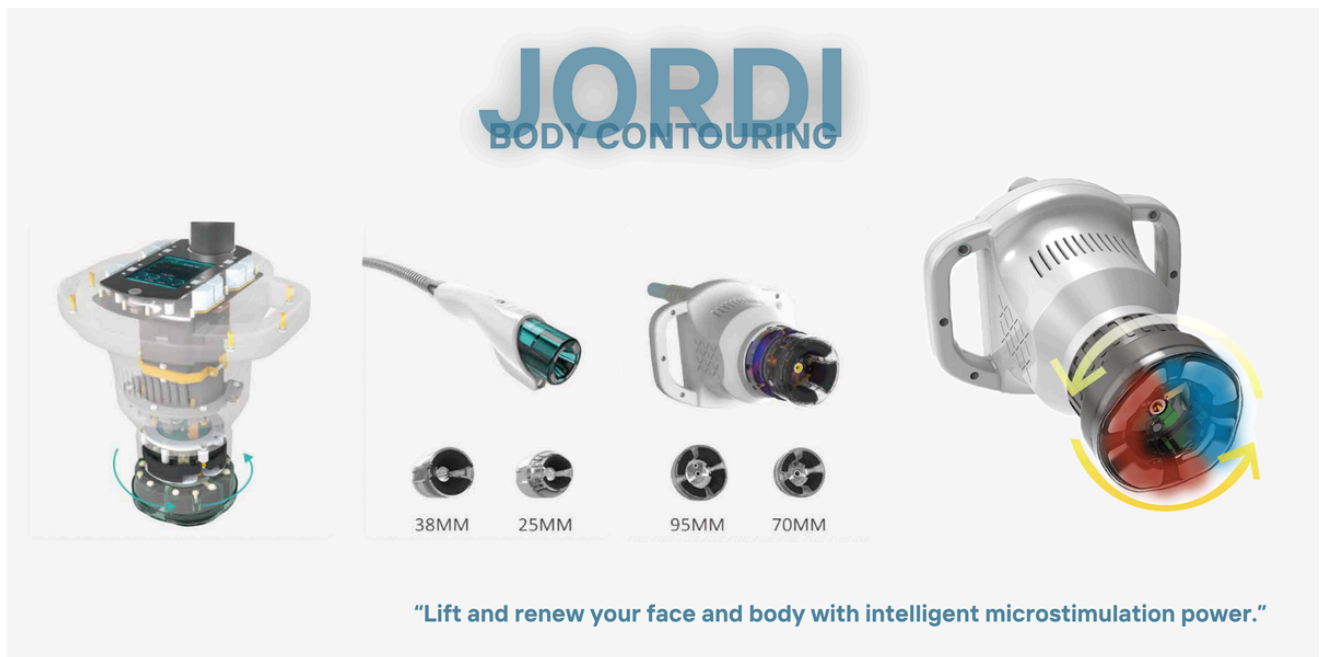

Confidence Through Science

This is not just about aesthetics. Jordi works by promoting collagen and elastin production at the cellular level, which helps tighten skin and restore youthful elasticity – delivering results that are beautiful, real, and long-lasting.

Why Jordi Body Contouring?

- **Body Shaping:** Precisely reshape and refine your clients' figures for a naturally stunning silhouette.
- **Cellulite Reduction:** Smooth away stubborn cellulite with a comfortable, effective treatment.
- **Fat Reduction:** Target and reduce unwanted fat in key areas safely and efficiently.
- **Body Toning:** Firm and tighten the skin for a more youthful appearance.
- **Confidence Boost:** More than body transformation – Jordi enhances body confidence and empowers your clients to feel radiant in their own skin.

Elevate Your Business with Jordi

Integrating Jordi Body Contouring into your service menu brings a powerful competitive advantage:

- **Stand Out:** Offer a premium, technology-driven sculpting solution with fast, visible results.
- **Attract Clients:** Ideal for those seeking non-invasive fat reduction and skin tightening.
- **Boost Revenue:** A high-value treatment perfect for packages and repeat sessions.
- **Professional Performance:** Reliable, clinic-grade technology with intuitive, customizable settings.

Safe, Effective & Impressive Results

- Designed for clinical safety, working naturally with metabolic and lymphatic processes.
- No downtime – clients resume daily activities immediately.
- Visible improvements in contour, firmness, and skin texture in just a few sessions.

Begin the Journey to Transformation

Invite your clients to experience the next level of body sculpting.

With Jordi Body Contouring, you don't just offer a treatment – you deliver a refined, confidence-boosting transformation.

4D HIFU Face-Body-Vaginal Tightening & Rejuvenation

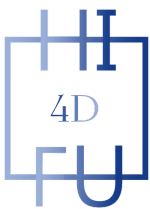

The most effective method for skin rejuvenation

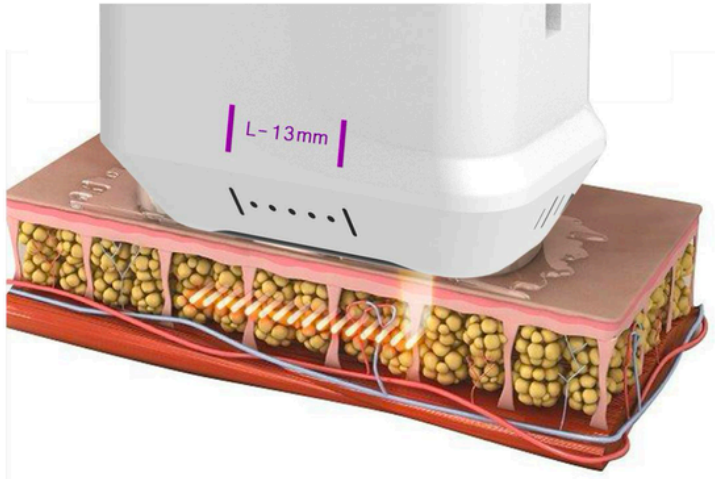

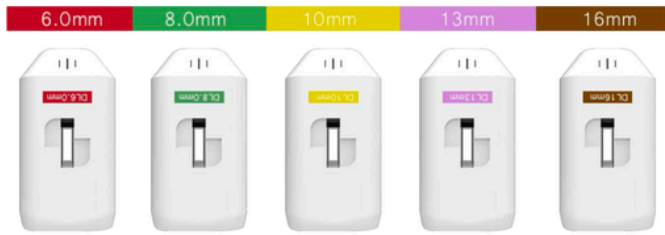

4D High Intensity Focused Ultrasound system is the most effective method for renewal of collagen and skin rejuvenation.

The new generation of 4D High Intensity Focused Ultrasound system is the most effective method for renewal of collagen and skin rejuvenation. Moreover, you will save your time and costs with the new innovative system. With 4D HIFU system, the ultrasonic waves emitted by the treatment head intersect at one point.

Therefore, their combined effect is intensified. Carna Medical Technology developed 4D HIFU have managed to achieve more accurate results than ever before. It's the latest non-invasive technology for facial lifting, skin tightening and body sculpting.

4D HIFU directly delivers the ultrasound energy to skin and subcutaneous tissue that can stimulate and renew the skin's collagen and thus consequently improving the texture and reducing sagging of the skin.

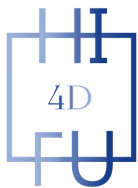

Vaginal 4D HIFU is performed to tighten and rejuvenate the vaginal canal with a non-surgical procedure.

With age, collagen fibres within the vagina begin to lose elasticity. The non-surgical vaginal tightening treatment improves the health and vitality of vaginal tissue, using Carna HIFU that is highly effective at rebuilding skin elastin while tightening.

Carna 4D HIFU Vaginal Tightening and rejuvenating is performed to tighten and rejuvenate the vagina canal with a non-surgical procedure. This application is provided by thermal and non-ablative effects of special ultrasound waves. It does not involve any incision, anesthesia or pain during the procedure. It's been used not only for the rejuvenation of vagina, but also for stress urinary incontinence treatment, sexual enhancement, menopausal vulvovaginal atrophy symptoms, and other therapy.

- Increasing sexual pleasure
- Vaginal dryness treatment
- Treatment of urinary incontinence
- Treatment of frequent vaginitis (vaginal infection)

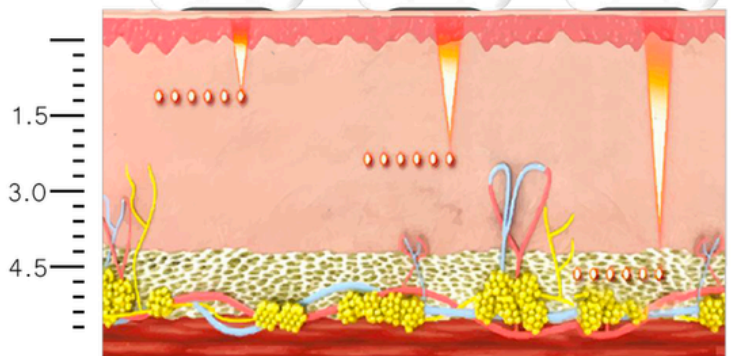

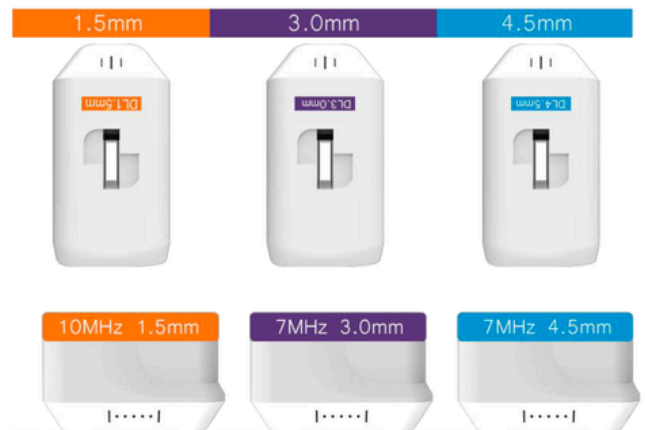

Reclaim your youthful glow with Carna 4D HIFU!

Restore Firmness and Boost Collagen Naturally

Combat skin sagging and achieve a youthfullift with Carna advanced 4D HIFU treatment. This non-invasive technology targets deep skin layers, stimulating collagen production to restore elasticity and firmness.

By encouraging your skin's natural healing process, 4D HIFU effectively reduces sagging, giving you a tighter, more contoured look.

- Non-surgical lifting for face and neck
- Stimulates natural collagen production
- Long-lasting, noticeable results
- No downtime or recovery period

REVOLUTIONIZING FAT LOSS & MUSCLE BUILDING

EMS Body Sculpting harnesses the power of electrical muscle stimulation to target and engage muscles in ways that traditional workouts simply cannot match. By delivering controlled electrical impulses to specific muscle groups, EMS triggers involuntary muscle contractions that mimic the effects of intense exercise. This process stimulates the muscles to work harder, leading to enhanced muscle tone, increased strength, and accelerated fat loss.

Unlike conventional exercise routines that may take months to yield visible results, EMS Body Sculpting offers noticeable improvements in a fraction of the time. With sessions lasting just 25 minutes, users can experience the equivalent of 35,000 squats, making it a highly efficient way to achieve fitness goals.

It has 4 different handles working at the same time for different places. Also it has special hips handle that build your pelvic muscles much more stronger so it shapes your hips in weeks. Also it support your sex life much more better than before.

In the realm of health and wellness, the importance of pelvic muscle strength often goes overlooked. Yet, strong pelvic muscles are crucial not only for core stability and overall fitness but also for sexual health and satisfaction. For both men and women, pelvic floor muscles play a vital role in sexual function, pleasure, and even fertility. Recognizing this, Carna EMS Body Sculpting has developed a specialized approach that not only helps in burning fat and building muscles but also focuses on strengthening pelvic muscles, offering a significant boost to sexual health.

EMS MUSCLE SCULPTURE

Do you want to build muscle just by lying down?
With the new EMS you can sculpt your body muscles much better and faster. With 35.000 squats or 30.000 sit-ups in 25 minutes, this new technology makes it easy to build healthy muscle, sculpt your body and burn fat.

4+1 HANDLES

Prevention of Pelvic Floor Disorders

Pelvic floor disorders, such as incontinence and prolapse, can significantly impact quality of life. By strengthening the pelvic muscles with Carna EMS Body Sculpture, both men and women can reduce the risk of these disorders. A strong pelvic floor provides better support for the bladder and other pelvic organs, helping to prevent these issues before they arise.

EMS Body Sculpting: Revolutionizing Fat Loss and Muscle Building

In the ever-evolving landscape of fitness and body sculpting, new technologies continually emerge, promising better, faster, and more efficient ways to achieve our ideal body shapes. Among these innovations, Carna EMS Body Sculpture stands out as a groundbreaking method that has taken the fitness world by storm. This revolutionary technology offers a non-invasive, efficient, and effective solution for burning fat, building muscle, and shaping the body without the need for strenuous workouts or invasive procedures.

QUANTUS Fractional RF Microneedle

**Radio frequency
technology to promote
collagen regeneration**

Revitalize. Renew. Redefine.

Carna Medical Quantus is an advanced RF fractional microneedling system engineered to deliver superior precision, unparalleled power, and outstanding clinical results. By combining ultra-fine microneedles with controlled radiofrequency energy, Quantus stimulates deep dermal remodeling, activating collagen and elastin production for visibly firmer, smoother, and rejuvenated skin.

The Future of Skin Rejuvenation!

Carna Medical Quantus RF Fractional Microneedling offers advanced technology, exceptional clinical power, and unmatched versatility – making it the perfect investment for modern aesthetic clinics seeking premium results and a strong return on investment.

Why Quantus?

- Precision Engineering
- High-quality insulated microneedles deliver RF energy exactly where needed—no more, no less.
- Elegant & User-Friendly Interface
- Streamlined design with intuitive controls for effortless clinical operation.
- Exceptional ROI for Clinics
- High patient demand and versatile treatment capabilities make Quantus a profitable addition to any aesthetic practice.
- Reliable & Consistent Performance
- Built with medical-grade components for long-term durability and stable output.

QUANTUS Fractional RF Microneedle

✓ Deep Dermal Remodeling

Fractional RF energy penetrates targeted depths to stimulate neocollagenesis while preserving epidermal integrity.

✓ Adjustable Needle Depth & Energy Control

From delicate rejuvenation to intensive scar correction, Quantus provides full customization for all skin types and indications.

✓ Wide Range of Indications

- Fine lines & wrinkles
- Acne scars & post-acne texture
- Skin laxity
- Enlarged pores
- Pigmentation irregularities
- Stretch marks

✓ Minimal Downtime

Patients enjoy fast recovery and natural-looking improvements without the risks associated with aggressive lasers.

✓ Safe for All Skin Types

Designed with safety in mind, Quantus is suitable for fair to darker skin tones with minimal risk of PIH.

GOLD STANDARD 0.1–4.0MM ADJUSTABLE FOR FACE AND BODY

Technology That Elevates Your Practice

Carna Medical Quantus uses a combination of fractional energy delivery, controlled depth penetration, and intelligent thermal management to produce powerful results with exceptional safety. This makes it an ideal option for clinics seeking a premium RF microneedling device with proven performance.
